

SAFETY DATA SHEET

Sunlight Dishwashing Liquid Regular

Section 1. Chemical Product and Company Identification

Product name	:	Sunlight Dishwashing Liquid Regular
Product description	:	Hand Dishwash Liquid
Product code	:	200000144071
Product code	:	67452857_U; 67451833

Relevant identified uses of the substance or mixture and uses advised against

		Identified uses
Consumer uses		
Supplier's details	:	Unilever South Africa (Pty) Ltd
		15 Nollsworth Crescent
		La Lucia 4051
		South Africa
e-mail address of person responsible for this SDS	:	Zama.Duma@unilever.com
	:	031 570 2223/+27 31 570 2223 (Internal Emergency Control Number)
hours of operation)	•	051 570 22257 27 51 570 2225 (Internal Emergency Control Number)

Section 2. Hazards identification

Classification of the substance or mixture	:	SKIN IRRITATION – Category 2 SERIOUS EYE DAMAGE – Category 1
		Percentage of the mixture consisting of ingredient(s) of unknown acute oral toxicity: 0 % Percentage of the mixture consisting of ingredient(s) of unknown hazards to the aquatic environment: 0 %

Date of previous issue: 00.00.0000

Version: 1.0

GHS label elements

Hazard pictograms	:	
Signal word Hazard statements	:	Danger Causes serious eye damage. Causes skin irritation.
Precautionary statements		
General	:	Read carefully and follow all instructions. Keep out of reach of children. If medical advice is needed, have product container or label at hand.
Prevention	:	Wear protective gloves. Wear eye or face protection.
Response	:	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Immediately call a doctor.
Storage	:	Not applicable
Disposal	:	Not applicable
Hazardous Ingredients	:	Sodium Dodecylbenzenesulfonate Sodium Laureth Sulfate
Other hazards which do not result in classification	:	None known.

Section 3. Composition/information on ingredients

:

Substance/mixture

Mixture

Ingredient name	%	CAS number
Sodium Dodecylbenzenesulfonate	>= 10 - <= 25	68411-30-3
Sodium Laureth Sulfate	> 0 - <= 10	68891-38-3

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

Inhalation: Get medical attention immediately. Call a poison center or physician.
Remove victim to fresh air and keep at rest in a position comfortable
for breathing. If it is suspected that fumes are still present, the rescuer
should wear an appropriate mask or self-contained breathing apparatus.
If not breathing, if breathing is irregular or if respiratory arrest occurs,
provide artificial respiration or oxygen by trained personnel. It may be
dangerous to the person providing aid to give mouth-to-mouth

		resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
Skin Contact	:	Get medical attention immediately. Call a poison center or physician. Flush contaminate skin with plenty of water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician. Wash clothing before reuse. Clean shoes thoroughly before reuse.
Eye Contact	:	Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician.
Ingestion	:	Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Chemical burns must be treated promptly by a physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Most important symptoms/effects, acute and delayed

Anticipated acute health effects		
Eye contact	:	Causes serious eye damage.
Inhalation	:	No known significant effects or critical hazards.
Skin contact	:	Causes skin irritation.
Ingestion	:	No known significant effects or critical hazards.
Over-exposure signs/symptoms		
Eye contact	:	Adverse symptoms may include the following: pain, watering, redness
Inhalation	:	None known.
Skin contact	:	Adverse symptoms may include the following: pain or irritation, redness, blistering may occur
Ingestion	:	Adverse symptoms may include the following: stomach pains
Indication of immediate medical atten	<u>tion</u>	and special treatment needed, if necessary
Notes to physician	:	Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
Specific treatments	:	No specific treatment.
Protection of first-aiders	:	No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing

thoroughly with water before removing it, or wear gloves.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media

Suitable extinguishing media Unsuitable extinguishing media	:	Use an extinguishing agent suitable for the surrounding fire. None known.
Specific hazards arising from the chemical Hazardous thermal decomposition products	:	In a fire or if heated, a pressure increase will occur and the container may burst. No specific data.
Special protective actions for fire- fighters	:	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Special protective equipment for fire-fighters	:	Fire-fighters should wear appropriate protective equipment and self- contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency person For emergency responders	su ur sp ve Pu : If ar	itable train protected p pilled mater entilation. ut on appro specialized ny informat	ing. Evacuate personnel fro ial. basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with noncombustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling

Protective measures	:	Put on appropriate personal protective equipment (see Section 8). Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respiratory protection. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.
Advice on general occupational hygiene	:	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
Conditions for safe storage, including any incompatibilities	:	Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

Section 8. Exposure controls and personal protection

Control parameters

Occupational exposure limits None.				
Appropriate engineering control		0	ist, fumes, gas, vapor or mi tilation or other engineering	· 1
Environmental exposure control	s : Emissions checked to protection	from ventilation of ensure they compl legislation. In som	r work process equipments ly with the requirements of e cases, fume scrubbers, fil the process equipment will	hould be environmental ters or
Version: 1.0 Date	of issue/Date of revision:	26.05.2022	Date of previous issue:	00.00.0000

to reduce emissions to acceptable levels.

Individual protection measures

Respiratory protection	:	Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.
Hand protection	:	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
Eye/face protection	:	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles. If inhalation hazards exist, a full-face respirator may be required instead.
Skin and body protection	:	Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Hygiene measures	:	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Section 9. Physical and chemical properties

Appearance

Physical state [Form] Color	Liquid [Liquid]Dark green.
Odor pH Melting point	 Perfumed. 5 [1000 g/L] Under normal conditions, melting point/freezing point will not be observed
Boiling point	: Under normal conditions, melting point/freezing point will not be observed
Flash point	: Non-flammable.
Lower and upper explosive (flammable) limits Vapor pressure Vapor density	 Lower: Not available. Upper: Not available. Not available. Not available.

Relative density	: 565 kg/m3
Solubility	: Not available.
Solubility in water	: Not available.
Partition coefficient: n-	: Not available.
octanol/water	
Auto-ignition temperature	: Not available.
Decomposition temperature	: Not available.
Odor threshold	: Not available.
Evaporation rate	: Not available.
Flammability (solid, gas)	: Not available.
Viscosity	: Dynamic: 1500 mPa.s
	Kinematic:Not available.

Section 10. Stability and reactivity

Conditions to avoid	:	None known.
Incompatible materials	:	None known.
Anticipated Hazardous decomposition products	:	Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Conclusion/Summary

Based on available data, the classification criteria are not met.

Acute toxicity estimates

Potential chronic health effects

General:No known significant effects or critical hazards.Carcinogenicity:No known significant effects or critical hazards.Mutagenicity:No known significant effects or critical hazards.	Conclusion/Summary	: Based on available data, the classification criteria are not met.
Fertility effects : No known significant effects or critical hazards.	Carcinogenicity Mutagenicity	No known significant effects or critical hazards.No known significant effects or critical hazards.

Section 12. Ecological information

Eco-Toxicity

Conclusion/Summary	:	No known significant effects or critical hazards.
Persistence/degradability		
Conclusion/Summary	:	The surfactants used in this mixture are readily biodegradable.
Bioaccumulative potential		
Conclusion/Summary	:	No known significant effects or critical hazards.
<u>Mobility in soil</u>		
Soil/water partition coefficient (KOC)	:	Not available.
Other adverse effects	:	The substances used in this mixture are neither a PBT- or a vPvB substance

Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

	South Africa National Road Traffic Act	IMDG	ΙΑΤΑ
UN number	Not regulated	Not regulated	Not regulated
UN proper shipping name	-	-	-
